

AMEVA Intelligence Report

2026-07-24 - 오전판

1. 마켓 브리핑 (Market Briefing)

GPU 리테일 주요 가격 (KRW)

모델명	현재 최저가	어제 대비 변동
GeForce RTX 4090	₩4,480,970.0	0.0%
GeForce RTX 4080	₩6,582,800.0	0.0%
GeForce RTX 4070 Ti	₩1,698,000.0	0.0%

2. AI 동향 요약 (AI Summary)

최근 수집된 데이터에 따르면 GPU 가격이 전반적으로 안정세를 보이고 있으며, 주요 반도체 기업들의 AI 인프라 투자 소식이 계속되고 있습니다.

3. 오늘의 주요 뉴스 (Top News)

◆ Fairphone 6 wide camera experimental Linux support

Experimental Linux support for the Fairphone 6 wide camera Background The Fairphone 6 is an interesting target for mainline Linux and postmarketOS for a few reasons: - It has relatively modern hardware compared with most other supported postmarketOS devices. - Fairphone invests in mainline Linux support, with Luca Weiss driving much of the development. - Those efforts have already provided promising initial support for the hardware. - Fairphone deliberately allows alternative operating systems. ...

◆ Malleable Computing, Emacs, and You

Malleable Computing, Emacs, and You 22 Jul 2026 Charles Choi It all started with a routine task. I use GitHub issues for all of my public-facing projects but my preference is keeping track of things in Org Agenda. To reconcile the two, I would manually copy over the GitHub issue to an Org file, typically the title and description, like an animal. Despite this separation, the duplicated issue allowed me to treat it as a scratchpad for anything I could express in Org. In this way, I used the dupli...

◆ Medici family mystery may be solved after more than 400 years

Since the mysterious deaths of a husband and wife in the Medici family, a powerful Italian dynasty that ruled Florence and Tuscany almost uninterruptedly from 1434 to 1737, rumors have swirled about what led to the couple's untimely demise. Now, scientists believe they have an answer — it wasn't murder, but malaria. In 1587, Grand Duke Francesco I de' Medici and his wife, Bianca Cappello, died within hours of each other after days of agony. At the time, logic dictated the culprit to be malaria b...

◆ **Protecting our FLOSS commons from LLMs**

In Brief: - Two motions regarding "artificial intelligence" and Large Language Models (LLMs) were voted on among Codeberg e. V. members and passed. - We are promising to not use any of your data to train LLM and explain what the planned Terms of Use change mean for 'vibe-coded' projects. - We believe that LLMs endanger the free/libre software ecosystem as a whole. The Codeberg e. V. annual assembly is the meeting that puts power into the hand of our active members. Proposals are discussed live, ...

◆ **Amiga 1000: Ten years ahead of its time**

On July 23, 1985, Commodore introduced its Amiga 1000 computer. And let's just say the world wasn't ready for it yet. Dave Haynie, a Commodore engineer who worked on the later models, has said there was no such thing as a 1980s computer. There were 1970s computers and 1990s computers, and it was the Amiga that dragged the rest of the industry into the 1990s. Ten years ahead of its time It is not hyperbole to say the Amiga 1000 was 10 years ahead of its time. Its custom chipset had color graphics...
